

FINGLAS CABRA PARTNERSHIP
MISSION STATEMENTS

We will work collectively in Partnership to influence the regeneration of our community with a particular commitment to creating positive change for people in need of additional supports, empowering them to shape their future and improve their quality of life.

Partnership

Working together as partners in joint endeavours, with a shared sense of purpose, mutual respect and willingness to consult.

Integration

Achieving a complex range of changes that involve partners establishing common goals, agreeing to use personal and institutional power to achieve them, working together and taking collective responsibility for outcomes. We also agree to commit resources and alter policies and procedures to attain our identified goals and objectives.

Equality

Ensuring equality of access, participation and outcome for all – regardless of gender, sexual orientation, age, family status, political persuasion, religion, and disability or ethnic origin.

Solidarity

Enabling groups experiencing inequality to participate in the process of analysing, planning and implementing activities to achieve identified goals. Examining and addressing underlying causes of inequalities is an integral part of this process.

Sustainability

Taking a long-term perspective, ensuring that initiatives piloted by the Partnership are enshrined in mainstream practice and that lessons learned locally inform and strengthen national policy development.

Learning

Continuing a flexibility of approach so that lessons learned through our experience are incorporated into our programmes and methods of work.

Broad Statement of Intent

The primary aim of Services to the Unemployed Committee is to improve the prospects of the long-term unemployed and those most distanced from the labour market to access suitable gainful employment and self-employment through education and training, work experience, job placement, enterprise & the social economy.

** To be revised as part of planning for T2016*
